Newsletter #46 - August 2024

The official newsletter of the 2nd/14th Light Horse Regiment (Queensland Mounted Infantry) Association

Welcome to our 2nd newsletter of the year for 2024. We have had a few functions this year and it was great to catch up with our members in a relaxed environment. Please see the articles by our members that attended. One of our members (Geoff Qualischefski) suggested that we meet on the southside down near Beenleigh. We did this a couple of weeks ago and plan on holding a similar activity on next year's calendar. If you have a suggestion for an activity or catch up, please let us know.

Please also check out the calendar for changes and additions that may interest you. The calendar can be accessed from our web page.

UPCOMING ACTIVITIES:

Committee Meetings – All members are invited to attend any of our committee meetings to view proceedings. Please check the calendar for dates and location or contact the Secretary at your convenience.

Regimental Bike Ride 24 Aug 24 - Event: 2/14 LHR Association motorbike ride from 0800hrs Saturday 24 Aug 2024, to Approx 1600 Sunday. Meeting at Albany Creek McDonalds Shell service station next door for fuel and tyre checks. Level - very easy. This is more about a catch up than the ride.

Description: Depart Albany Creek McDonald and follow the map for a gentle ride within the speed limit ride. No motorbike, no worries. Bring the car.

Unit Family Day Function 13 September 24 Please see the separate flyer. Anyone needing access to the barracks please touch base with the secretary and we will organise it. I will be attending so I hope to see some of you there. It should be a good day.

United Drum Head Service 2 November 2024 to add battle honours to the unit guidons. More information will be forthcoming once the unit releases the final admin instruction. For those that are keen please touch base with the secretary so we have a rough idea of numbers. I will be attending so hoping to see a good attendance.

41 Club Black Hat family Reunion Saturday 9 November 2024 emails have been sent out for our annual reunion to our members and the wider RAAC community. I have received 35 acknowledgements for attendance and no doubt this will increase as time goes by. I will send out another couple of reminder emails before the event. Hope to see you all there and it is a great time to catch up with friends. As always, we encourage you to bring a friend that may not have attended or may have missed the last couple of years.

If anyone is experiencing difficulties, please do not hesitate to reach out. We, the association, will help in whatever way we can, even if it is just a chat on the phone or a coffee.

Please feel free to contact me on any matters that we may be able to assist you with. My number is 0431 700 696.

REDBACK IFV

A mounted mobile camouflage system. Photo: CBG Systems

CBG Systems will supply SolarSigmaShield Mobile Camouflage Systems for the Australian Army's Redback infantry fighting vehicles under Project LAND 400 Phase 3.

The Tasmanian thermal and acoustic insulation and specialist antenna system manufacturer announced they had signed a contract with Hanwha Defence Australia (HDA) for systems, earlier this month on 8 July. It's understood that the SolarSigma Shield systems are designed to provide solar heat load reduction and multispectral signature management.

"CBG Systems has signed a contract with Hanwha Defence Australia to supply SolarSigmaShield mobile camouflage system for the Redback infantry fighting vehicle – LAND 400 Phase 3," the company said in a public statement earlier this month.

"CBG Systems is proud to contribute Australian-manufactured products to what will be a world-leading capability for the Australian Army."

Earlier this year in May, CBG Systems announced they were also working with Hanwha Defence Australia to deliver advance Mobile Camouflage System (MCS) SolarSigmaShield for the self-propelled howitzer project, LAND 8116.

"Our MCS will be customised to fit the AS9 Huntsman 155mm SPH and the AS10 armoured ammunition resupply vehicle (AARV), both of which HDA will deliver under phase 1 of the project," the company said. "We are currently contracted to deliver MCS on nine AS9 SPHs and five AS10 AARVs from batch 1 and 2 of LAND 8116 Phase 1, with manufacture of these units having already commenced."

Commemorating Australian service in Timor-Leste

In 2024, the Australian Government will mark the 25th anniversary of Australian service in Timor-Leste with a televised National Commemorative Service (service).

Where: Australian Peacekeeping Memorial, Anzac Parade, Canberra
When: 9:30am, 20 September 2024

Attendees are encouraged to plan their journey and arrival times carefully. The site will open at 8:30am and you are requested to arrive prior to 9:30am.

You are encouraged to use public transport, where possible, to attend the service as car parking is extremely limited.

Seating is available for this service. Accessible seating and support are provided to those who have indicated a need for accessible assistance when registering their intent to attend the service.

You are encouraged to register your intent to attend this service at dva.gov.au/timor-leste25.

Study for 'DVA' which? (Media/colour, pencil on paper, 36.2 x 47cm, 400M ARTISTIQUE, PG0712)

A Reminder

41 Club Black Hat Family Reunion

The sequence will be as before, and the timings are:

What - 41 Club Black Hat Family Reunion;

Date - Saturday 9 November 2024;

When – 1300hrs-1800hrs;

Where - 41 Club - RV front gate at between 1230hrs and 1300hrs;

Cost - \$**tb**c for the meal portion.

More information will be sent out at a later date on the induction process.

As in previous years we will RV at the front gate at 1230hrs and travel in convoy up to the 41 Club escorted by the guard.

As always please stay flexible and please pass this along to any and all Black Hats or members that have been posted to a Black Hat unit.

An armed M113 Armoured Personnel Carrier during long-range firing trials in Victoria. Photo: EOS

INDUSTRY TESTS REMOTELY OPERATED M113 APC IN LIVE FIRE EXERCISE

The Australian Army and domestic defence industry have tested an armed M113 armoured personnel carrier (APC) during long-range firing trials in Victoria.

The M113 APC was equipped with an R400 remote weapon system (RWS), manufactured by Canberra-based defence company Electro Optic Systems (EOS), for the testing at Puckapunyal Military Area. The Army’s Robotic and Autonomous Systems Implementation & Coordination Office has previously converted the APCs into autonomous M113 AS4 optionally crewed combat vehicles.

The R400 weapon system is designed to utilise a 30mm cannon to engage targets such as small to medium unmanned aerial systems and STANAG Level 3 protected vehicles. It can also reportedly accommodate machine guns, automatic grenade launchers, and anti-tank guided missiles.

During the recent testing, EOS staff located in Canberra were reportedly able to remotely operate the RWS (approximately 550 kilometres away) and successfully engage targets at 300 and 600 metres.

“The success of this live fire counter-drone exercise at Puckapunyal is a testament to the dedication and expertise of ADF and EOS personnel and their commitment to advancing military capabilities,” according to Ian Cook, EOS Defence Systems executive VP.

“It also highlights the importance of continuous innovation and training in modern warfare.” The achievements of this exercise represent a significant leap forward in military technology, offering enhanced precision, safety, and operational versatility, according to the company.

BEENLEIGH CATCH UP

By Dean Chappel

Black Hat Catch Up Beenleigh RSL 14 Jul 24

The gathering of the Black Hats on 14 July was held at the Beenleigh RSL Golf Club. This place was chosen as one of our elder members Geoff (with a silent E) Gaulischefski, who was a member of the Unit many years ago, informed us that he was unable to attend any functions due to his age and declining health.

So for some of us it was another day out but the others needed to ensure their passports were up to date to head off on the journey south of the Brisbane River. Some 20 odd members and their families joined us there for a lovely lunch and chin wag amongst ourselves and with Geoff (with a silent E). It was a lovely day with Geoff enjoying the Comradery of being amongst some of the Units younger members, where he was able to recall some of his past and for us to learn some of our history. A former CO Tom Childs joined us as he knew Geoff when he was there.

A successful day that has the Committee inclined to hold one out there every year, which allows us to hold one North and south of the great divide. The photos include the members and families at lunch and in front of my Tank which I brought along for the day.

Dean Chappel

"I had a great time at our event's day at Beenleigh RSL at Mount Warren, with the Leopard tank 1 guarding the entrance to the clubhouse.

I am sure we all enjoyed ourselves and are looking forward to the next event."

***Yours in Armour,
Geoff Qualischefski***

CO'S UPDATE ~ By LTCOL Tim Hurley

First, I would like to thank the members of the Association for their continued interest in the Regiment and for continuing to support both the current serving and ex-serving members of the finest unit in the nation. I trust you have all had a fulfilling 2024 and I look forward to catching up at the 41 Club reunion on 9 November.

The Regiment has had a reasonably busy year as we went about preparing our squadrons for our primary function: warfighting. Our primary exercise period commenced immediately following ANZAC Day, and saw the Regiment in Shoalwater Bay for exercises Koster River and Diamond Dagger respectively. During the exercises, we conducted troop and squadron level live fire manoeuvre, followed by a week-long battlegroup level dry training activity. I was very satisfied with the performance of our soldiers over a testing five-week period. The final live fire activity marked the last 120mm rounds fired by main battle tanks at 2/14 LHR, which was a bitter-sweet moment and one I won't readily forget.

2024 can be chalked up as a year of considerable transition. Following our return from Shoalwater in early June, our support staff and tank crewmen worked busily to divest the M1A1 Abrams tanks and M88A2 HERCULES recovery vehicles from the Regiment as part of Army's reorganisation following the Defence Strategic Review. In addition, we continue to sustain the Boxer Block I and ASLAV fleets and are preparing for the introduction of the Boxer Block II fleet. The concurrent introduction of new platforms, divestment of heavy armour and preparation for the transition of a sub-unit in 2025 has kept us busy. August sees us preparing and deploying a Platoon (+) of our troopers, NCOs and officers to Rifle Company Butterworth, as well as a more limited commitment to the Brigade Warfighter Exercise – Exercise Diamond Run. We will continue to run conversion courses on the Boxer Block I platform in order to future-proof our workforce, and are commencing limited train-the-trainer courses on the Boxer Block II in preparation for the wholesale conversion of the rest of the Regiment – including the re-raised C Sqn (CRV) – in 2025.

We have a number of people currently deployed on operations, with others to follow. At the moment have folk as far afield as Japan and the UAE and are soon to have others in Malaysia, the United Kingdom and Tonga. We continue to revel in the unique culture within the Light Horse Regiment, with the 41 Club at its core. We managed to call in a few favours from the 6th Engineer Support Regiment who have done a remarkable job at improving the facility to include new lighting, fans, wiring and concreting. They have improved the drainage and

built a culvert strong enough to hold the weight of a Boxer to replace the existing wooden footbridge. They will continue to work on the area surrounding the volleyball court over the coming months to continue to improve the facilities for the use of our members and the Regimental family.

I look forward to catching up with you all at the reunion later in the year. This year I have petitioned our soldiers to deepen their connection with the wider Regimental community and would love to see our recently transitioned members feel welcome to come back to the 41 Club whenever they so desire. A thriving Association is the sign of a healthy unit, so I implore you to reach out to both current serving and recently transitioned members to remain connected with the Regiment. It does wonders for self-esteem and identity. Whatever I can do to inculcate sense of belonging that from my end, I will do. I ask you help me in that endeavour.

All the best and I look forward to sharing a beer or two when we next catch up.

Regards,

Tim Hurley
Commanding Officer

AGM REPORT ~ By Craig Whiteman

The AGM was held on Friday 24 MAY 2024 as advertised. This year's venue was the library at the Kedron Wavell Services Club (KWSC). A big thanks to KWSC for supporting the AGM and waiving all venue fees.

The President's Report

The President, Shayne Burley gave a report on the 2023-24 year to date. Some key points are as follows:

- The Association is now 11 years old and that we are financially secure.
- He introduced the Regiment's new leadership team: CO, LTCOL Timothy Hurley and RSM, WO1 Bill Doodie.
- The President advised that that this year's Black Hat Union at the 41 Club on 9 November will be attended by former CO and now COMD 1 Div, MAJ-GEN Collingburn.
- That the EOY Drinks planned for 5 December would be held at the 41 Club as opposed to South Brisbane. Families are welcome.
- Bill Cross and Graeme Brown were acknowledged for their efforts publishing the quarterly Newsletter. The Web and Facebook pages are very professional sites that also contain notices on upcoming events and breaking news.
- The President thanked the members of the Association and Committee for their ongoing support.

Treasurer's Report

The Treasurer, Dean Chappel presented the Treasurer's Report including the audited Financial Statement for the year ending 31 December 2023. A copy of the audit report shows an operating deficit of \$2,020 and a balance of \$19,974.

The operating deficit was due to the Associations 2023 financial commitment to the memorial for the

Regiment's two deceased Soldiers who died in FNQ in 2022. The commemorative service in August 2023 was attended by the HONCOL, Steve Salmon and the Secretary, Craig Whiteman.

RWM Chartered Accountants were reappointed as the Association's auditor for 2024.

The Committee

The Committee was reelected. Unfortunately, there were no additional nominees and the position of Assistance Treasurer remains vacant. The members of the 2024-2025 Committee are as follows:

President	Shayne Burley
Vice President	Shane Lucas
Treasurer	Dean Chappel
Assistant Treasurer	Vacant
Secretary	Craig Whiteman
Assistant Secretary	Cory Holland
Membership & Media Member	Graeme Brown

All members are encouraged to consider nominating for the Committee. Holding a key appointment is not a requirement.

Unit report

As the Regiment was deployed to SWBTA a unit representative was not available for the AGM. The President gave an overview of recent developments in the Corps. Some key points are as follows:

- The new generation Abrams Tank will be concentrated in Townsville with 2 Cav Regt. 3 Bde will transition to a heavy brigade.
- Our Regiment will continue its transition to the Boxer reconnaissance vehicle. 7 Bde will revert to a wheeled brigade.
- 1 Armd Regt will remain in Adelaide as a trials regiment. 1 Bde will transition to a light brigade.

TALL TALES CAMP ~ *By Shane Lucas*

The Tall Tales Camp was delayed this year. Originally set down for mid-June, unfortunately the school holidays got in the way and our usual accommodation was not available.

Anyway, fast forward a month and we eventually managed to get into Baden Powell Park on Saturday the 20th of July. The week leading up to it averaged overnight temperatures of 5 degrees, so it was always going to be a challenge for our aging bones. Craig was clearly keen, arriving just after 1400h to get the Lodge opened and ready for the evening, someone forgot to tell the caretaker though.

Once Danny arrived with the firewood, the pit was prepared, and the night kicked off in earnest. But not only did he bring the usual tray of hard wood, but he also bought some old furniture to burn – I must admit, there was an early suspicion that the disposal of evidence from his days in the coppers may have been occurring! Shayne was in his element though, eagerly throwing on one piece after another and appearing truly enthralled by the fire's effect; it's called pyromania just in case you're wondering.

Brett was approached early to see if he was up for the all-night fire picquet this year but politely declined, at least I think that's what he meant when he said, "Fuck off mate, not this year!" Griffo and Sunshine Jordan made an appearance and looking more and more like Statler & Waldorf every year!

Brownly assumed his usual role as official photographer and grabbed some good, early and much less incriminating shots this time around. Thankfully Dean left the Stones Green Ginger Wine at home, mate its only good if you've run out of hand sanitizer or you're on Pucka Range in the middle of a blizzard and in that event only if you've run out of hand sanitizer! Anyway, after a few contentious issues with the DJ/musical arrangement, we retired for a few hours sleep waking to the classic bacon and egg burgers and coffee.

All round, it was another good year and if you've never been, then there is always next year.

Author: Shane Lucas

OWL DRONE

Innovaero's OWL-B is launched from Insitu Pacific's Mark 4 Launcher

Army to introduce Owl loitering munition

An unspecified Special Operations Unit of the Australian Army will put the Australian Defence Force's (ADF) first loitering munition - the Innovaero Owl - into service later this year.

ADM understands that this is the munition referred to by the Assistant Minister for Defence, Matt Thistlethwaite, at the 2024 ADM Congress in February this year. The Owl has been in development since 2022 for the Army, and is designed to integrate with other uncrewed aerial systems (UAS) being acquired by the ADF.

Innovaero, which has been partially owned by BAE Systems Australia since October 2023, is based in Kardinya, Western Australia.

Austender records show that Innovaero has been awarded more than \$5.3 million in Defence contracts since May 2022 to design, develop, build and test the aircraft. During the 2023 Avalon Airshow in March last year, company representatives told ADM Senior Correspondent Julian Kerr that a pre-production prototype would be displayed to Defence before the end of 2023, with a procurement decision to follow.

ADM understands that this demonstration was successful, paving the way for the Owl to enter service this calendar year.

The new system is expected to help the Army both mature its understanding of loitering munitions ahead of them being fielded more broadly across the force and provide a genuine loitering munitions

capability to Special Operations Command (SO-COMD).

Throughout the development process Innovaero has collaborated closely with Insitu Pacific, a Boeing subsidiary which is delivering the RQ-21 Integrator UAS to the Army, to maximise commonality between the two systems.

Initially this focused on integrating the Owl with the same pneumatic launcher used by the RQ-21, however, in October 2023 the companies agreed to develop an integrated long-range strike capability using both types of UAS.

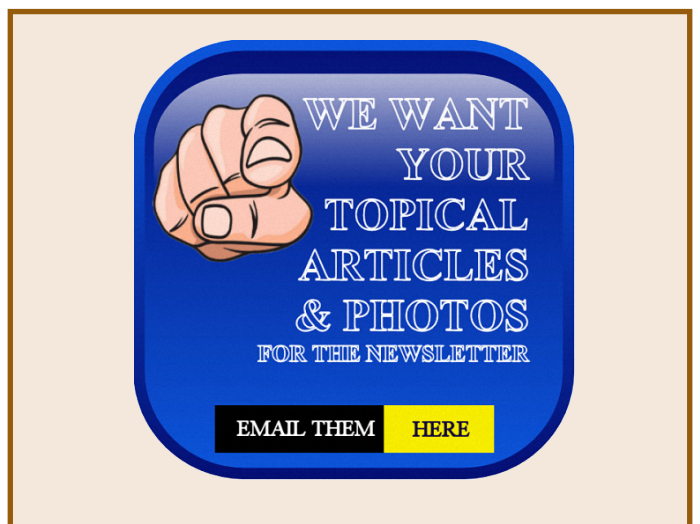

As part of this collaboration, they announced their intent to integrate the Owl with Insitu Pacific's common ground control system and INEXA command and control software.

Neither Defence or Innovaero responded to questions from ADM prior to publication.

ADM Ben Felton - Canberra - 3 June 2024

CORPS DINNER - SCHOOL OF ARMOUR PUCKAPUNYAL VIC

20 APRIL 2024 ~ *By Steve Salmon*

Over the period 17-20 April I attended the Corps Conference along with the Commanding Officer of the Regiment, LTCOL Tim Hurley. I always look forward to going back to Pucka where I spent seven years of my life serving at the School and Directorate of Armour. Of course, the place continues to change and there has been a new hospital and gym opened in the last few years. But those who spent time there many years ago will still recognise the place: the married quarters remain, even those that should have been torn down many years ago; the old golf course still meanders through the centre although it is years since anyone played golf; the Rugby, Australian Rules and Cricket ovals still all look in good condition; and the Pucka shops look the same as they have for the last 20 years.

The first day of the Conference was aimed at providing everyone with an understanding of the current status of the AFV fleet and what the basis of provisioning for each unit will be going forward. This included the Infantry Fighting Vehicles (IFV) and the Combat Engineering Vehicles (CEV). MAJ Kate Clarkson, OC A Sqn, gave a very good presentation on the lessons learned from the introduction into service of the first phase of Boxers including the tactical adaptations required of utilising a new and highly technical capability. I couldn't help thinking that nearly the same presentation, with the same themes, could have been given after the introduction into service of the ASLAV Ph1 vehicles and both the Leopard and M1 tanks, many years ago. That evening the Hon COLs and COs had a dinner which gave us old fellas the opportunity to tell 'tall tales' and tell each other 'how good it once was'.

Friday was a serious day for the Conference where there were some long discussions surrounding the movement of all the tanks to Townsville, under 2 Cav Regt, and the re-rolling of 1 Armd Regt. There is clearly a lot of emotion surrounding the topic and I can assure everyone reading this that it is not the preferred solution of the Corps. Nonetheless, with the decision having been made it behoves each of us to continue referring to the Corps as still having three FT Regiments (1 Armd, 2 Cav and 2/14 LHR). 1 Armd Regt's role may have changed but it is important that the Regimental framework of the HQs and support elements endure so that at some time in the future it remains a viable option to, once again, brigade all the tanks back under 1 Armd Regt's control. It is my personal view that although Defence is acquiring significant new capability and Army is acquiring long range strike capabilities, SP artillery and a littoral manoeuvre capability our ability to engage in, and win the close fight is becoming tenuous. The role and effectiveness of 2/14 LHR as an ACR remains strong and the Regt will be a key capability for Army, and the Govt, for years to come.

The conference also took a break to observe WO2 Danny Rigoni's funeral service. A large number of us went to the Puckapunyal chapel where the service was streamed live. While I wasn't able to attend, it was good to see the Association strongly represented. Also that day we had the opportunity to view one of the serials in the Coral/Balmoral Cup where, I believe for the first time, a team from the USMC participated.

Friday evening at the Corps Conference is the gathering in the SGT's mess for the Corps Happy Hour which nearly always transpires into a long night of drinking and reminiscing. I'm pleased to say this year was no different and I found myself having beers with Andy Stocks, Tim Finn and Phil Prosser into the early hours of Saturday morning. The following day is recovery time for most while a few of us attend the Corps Council. The Corps dinner was held that evening in the Peter Branigan hangar and once again the place looked fantastic. The tables are all set in the middle of the hangar and are surrounded by the plethora of armoured vehicles that we have all seen and worked with throughout the years: Centurions, Leopards, M1s, LAVs, Scorpion FSV, Saladin, M113 to name but a few. During the dinner a number of Corps members are farewelled and I truly believe it is a fitting way to farewell those who have served 20 years or more in the Corps. The teams from the Coral/Balmoral Cup were also in attendance and as many of you would know the 2/14 LHR (QMI) crew won the trophy for the best tank crew in the Corps. The CO later brought the crew into the Officers Mess for a drink and it was wonderful to see the crew having a good chat with the current Divisional Commander and old CO of the Regiment: MAJGEN Ash Collingburn AM, DSM.

The Corps Conference is a great way of getting the current members of the Corps attuned and aligned to a single policy enabling everyone to speak with a single voice but the camaraderie at the social events is always the highlight. There seems to be a view that only a select few can attend the Corps Happy Hour and Dinner but that is not the case and I would encourage everyone to attend at least once and catch up with old friends. I look forward to seeing some of you there next year.

COL (Retd) Steve Salmon, Patron

RHEINMETALL UGV'S

Rheinmetall paves the way for autonomous Unmanned Ground Vehicles (UGVs) in Japan after being awarded a multi million-dollar contract on behalf of the Japanese Ministry of Defense.

The Rheinmetall Mission Master SP UGVs are expected to be delivered early next year for testing. These compact, low-signature electric UGVs will each be equipped with different payload modules, including cargo, surveillance and a remote controlled weapon station. The contract also includes a long-term support and training program, as well as spare parts.

Rheinmetall will deliver the UGVs in collaboration with the prime contractor Marubeni Aerospace, a major Japanese business conglomerate that will be trained by Rheinmetall to offer local support to the Japan Ground Self-Defense Force.

The Rheinmetall Mission Master SP is a fully electric, compact UGV that is designed to autonomously carry out missions such as forward and last mile resupply missions, silent watch operations, and carriages of light payloads, including

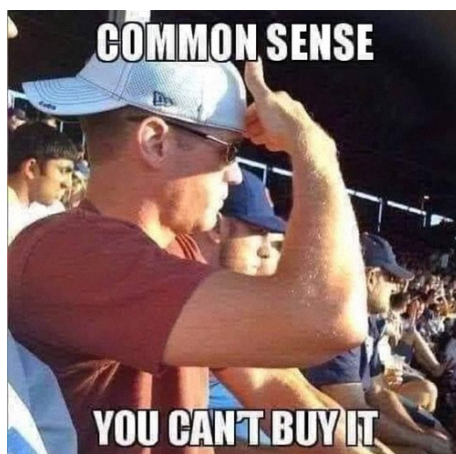

section sensors and weapon systems. The vehicle can be towed or deployed by parachute to carry out missions in hard-to-reach terrain, and fitted with tracks to enhance mobility in deep snow and mud—an ideal feature for countries with extreme climates like Japan.

The Mission Master SP was the first UGV to be developed by Rheinmetall Canada in 2017 and has since been deployed during multiple live military exercises by land forces, including the German, USA, Royal Dutch, and Polish armies. Various NATO partners, such as the UK and the USA have also acquired this UGV.

Like other platforms in the Rheinmetall Mission Master family, the SP vehicle is driven by Rheinmetall PATH: an AI-powered navigation system that can be installed on any vehicle. This agnostic suite of advanced sensors and perception algorithms enables the Mission Master vehicles to navigate autonomously through challenging environments.

“As international tensions continue to rise, more and more countries are seeking autonomous solutions to maintain a competitive advantage and prepare for the modern battlefield. Our Mission Master vehicles equipped with our PATH A-kit have performed well in numerous international trials in recent years. These experiences have allowed us to refine our technology and become an internationally renowned centre of excellence for UGVs,” commented Pietro Mazzei, President and CEO at Rheinmetall Canada
